Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

PROJECTS

Flask Microblog Copy for learning purpose of The Microblog project by Miguel Grinberg, a full-featured web application built with the Flask framework. It serves as a practical example to learn modern web development using Python. The application allows users to register, log in, create profiles, follow other users, and post short messages similar to a social microblogging platform

CERTIFICATIONS

[FreeCodeCamp, 05/03/2023]
Responsive Web Design The Responsive Web Design course from FreeCodeCamp teaches the fundamentals of building web pages that adapt seamlessly to different screen sizes and devices. It covers HTML, CSS, and modern layout techniques like Flexbox and CSS Grid. Students learn to create accessible, visually appealing, and fully responsive websites while practicing hands-on projects such as surveys, portfolios, and landing pages
